2018 Curriculum and Teaching Quality and Risk Appraisal (CTQRA)
Enhanced Program Risk Model – Detailed Explanation

1. Background

CTQRA is a process to ensure that programs and courses are reviewed annually. The CTQRA process enables a focused evidence-based reflection on the overall quality of all teaching programs and courses. Internal and external standards and benchmarks as appropriate, such as the Go8 benchmarks and TEQSA’s Risk Assessment Framework provide sources of evidence to inform the process.

Based on the feedback received during the 2017 CTQRA process, the Learning Analytics team made minor modifications to the 2018 CTQRA program risk calculations:

- For undergraduate programs, the data from the Graduate Outcomes Survey (GOS), that is ‘Overall Satisfaction’ and ‘Full-Time Employment’, will be compared to the Faculty and UQ benchmarks in the 2018 risk calculations. Risk scores were not given to these two indicators in the 2017 risk calculations since it was the first release of the GOS data in 2017.
- For postgraduate programs, the data from the Graduate Outcomes Survey (GOS), that is ‘Overall Satisfaction’ and ‘Full-Time Employment’ will be presented without the associated risk scores, as there are no Faculty and UQ benchmarks and we only have two years of data which is insufficient to calculate the benchmarks based on historical data for these risk indicators.

Figure 1 summaries the differences between the 2017 and 2018 program risk calculation models.

---

### 2017 CTQRA Program Risk Model

**Program Risk Indicators**

1. QTAC 1st Preferences OP1-5 *(for undergraduate programs)* or Number of Applications *(for postgraduate programs)*
2. Student Load (EFTSL)
3. Institutional Retention (Domestic)
4. Institutional Retention (International)
5. Program Retention (Domestic)
6. Program Retention (International)
7. Pass Rate
8. Overall Satisfaction (until 2015)*
9. Full-Time Employment (until 2015)*

*Data from the Australian Graduate Survey (AGS)

**Risk Scores for Individual Risk Indicators**

0=not at-risk; 3=at-risk

**Trend Risk Statuses**

- Number of at-risk indicators
- Data trend for each risk indicator

---

### 2018 CTQRA Program Risk Model *(preliminary retention data for 2017 will be released in September 2018)*

**Program Risk Indicators**

1-7: Same as in 2017
8. Overall Satisfaction from GOS
9. Full-Time Employment from GOS

*Note: For undergraduate programs, risk indicators 8 & 9 will be compared to the Faculty and UQ benchmarks and the associated risk scores will be calculated*

**Risk Scores for Individual Risk Indicators**

0=not at-risk; 3=at-risk

**Trend Risk Statuses**

- Number of at-risk indicators
- Data trend for each risk indicator
Table 1. Differences between the 2017 and 2018 program risk calculation for undergraduate programs. Highlighted areas showed the changes made in the 2018 program risk calculation.

Risk score: 0=not at-risk; 3=at-risk |
| 5. Program Retention (Domestic) | Obtain the program retention value at 95% cut-off for each year from 2011 to 2016. Then, calculate the mean for the benchmark for each Faculty and UQ.  
**At-risk:** <Calculated Faculty/UQ benchmark  
Risk score: 0=not at-risk; 3=at-risk | Obtain the program retention value at 95% cut-off for each year from 2011 to 2017. Then, calculate the mean for the benchmark for each Faculty and UQ.  
**At-risk:** <Calculated Faculty/UQ benchmark  
Risk score: 0=not at-risk; 3=at-risk |
| 6. Program Retention (International) | Obtain the program retention value at 95% cut-off for each year from 2011 to 2016. Then, calculate the mean for the benchmark for each Faculty and UQ.  
**At-risk:** <Calculated Faculty/UQ benchmark  
Risk score: 0=not at-risk; 3=at-risk | Obtain the program retention value at 95% cut-off for each year from 2011 to 2017. Then, calculate the mean for the benchmark for each Faculty and UQ.  
**At-risk:** <Calculated Faculty/UQ benchmark  
Risk score: 0=not at-risk; 3=at-risk |
| 7. Pass Rate            | **At-risk:** <85%  
Risk score: 0=not at-risk; 3=at-risk | **At-risk:** <85%  
Risk score: 0=not at-risk; 3=at-risk |
8. **Overall Satisfaction**

Obtain the program retention value at **90%** cut-off for each year from 2011 to 2016. Then, calculate the mean for the benchmark for each Faculty and UQ.

For data until 2015 from AGS, **At-risk**: \(<\text{Calculated Faculty/UQ benchmark}\)**

Risk score: 0=not at-risk; 3=at-risk

For data in 2016 from GOS, they were presented without the associated risk scores.

For data in 2017 from GOS, they are presented without the associated risk scores, as there are no Faculty and UQ benchmarks and we only have two years of data which is insufficient to calculate the benchmarks based on historical data for this risk indicator.

9. **Full-Time Employment**

Obtain the program retention value at **80%** cut-off for each year from 2011 to 2016. Then, calculate the mean for the benchmark for each Faculty and UQ.

For data until 2015 from AGS, **At-risk**: \(<\text{Calculated Faculty/UQ benchmark}\)**

Risk score: 0=not at-risk; 3=at-risk

For data in 2016 from GOS, they were presented without the associated risk scores.

For data in 2017 from GOS, they are presented without the associated risk scores, as there are no Faculty and UQ benchmarks and we only have two years of data which is insufficient to calculate the benchmarks based on historical data for this risk indicator.
1. The 2018 Enhanced Program Risk Model and Program Dashboards

- QTAC 1st Preferences OP1-5 (undergraduate)/No. of Applications (postgraduate)
- Student Load (EFTSL)
- Institution Retention (Domestic)
- Institution Retention (International)
- Program Retention (Domestic)
- Program Retention (International)
- Pass Rate
- Overall Satisfaction (GOS)
- Full-Time Employment (GOS)

1. Determine if each risk indicator reached the KPI/benchmark
   (if reached, risk status = 0 (not at-risk);
   Did not reach, risk status = 3 (at-risk))

2. Count the number of at-risk indicators for each year

3. Data trend for each risk indicator

Undergraduate Program Risk Overview (using Faculty level benchmarks)
To view detailed program information, select a code or name from the list below.
Step 1: Determine if each risk indicator reached the Faculty/UQ benchmark

Step 2: Count the number of at-risk indicators for each year

Using an undergraduate program as an example, a risk score of 0=not at-risk (reached benchmark) or 3=at-risk (did not reach benchmark) is assigned to each risk indicator based on the Faculty benchmarks as follows:

<table>
<thead>
<tr>
<th>Program ABCD</th>
<th>2015 Value</th>
<th>2015 Faculty At-Risk Benchmark</th>
<th>2015 Risk Score</th>
<th>2016 Value</th>
