

# Creating Study Resources

Creating study resources drives learning and helps built your course's pool of study resources

# There are four types of study resources you can create

**Multiple Choice Question**

Multiple choice questions are best for testing oneself and others: one of the most effective ways to learn

**Multiple Answer Question**

Multiple answer questions are multiple choice questions that have multiple correct options

**Worked Example**

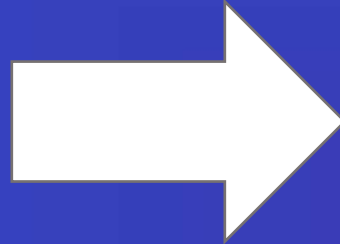

Worked examples are created to help students learn how to solve complex multi-step problems

**Notes**

Learning notes are created to give students information and can include videos, slides, simulations and more.

**After a resource is created it will go through moderation.  
During moderation, your classmates and teachers check  
the resource is correct and effective.**

## Resource Moderated

By peers & instructors

Approved

If the resource is approved, it will be available for practice

Rejected

If the resource is rejected, it will be sent back to you for changes.
